Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' process for producing isopulegol or optically active isopulegol is unobvious over the prior art of record. Although the prior art of record teaches processes for producing isopulegol by selectively cyclizing citronellal in the presence of a number of individual organometallic catalyst (e.g., Zinc halides, alkylaluminum chloride, scandium trifluoromethanesulphonate, etc.) the prior art does not teach or suggest producing isopulegol or optically active isopulegol as presently claimed, wherein the selective cyclization of citronellal or optically active citronellal takes place in the presence of a tris(2,6-diarylphenoxy)aluminum catalyst represented by formula (3) of the present claim 1. All claims (1-3) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
